

New developments in UK Robotics

ADVANCED DESIGNS FOR EDUCATION, INDUSTRY AND THE HOME CONSTRUCTOR

Robotic experience is becoming as essential a subject as computing. MICROGRASP provides the lowest cost means of acquiring that experience but despite its ultra low price the robot has considerable versatility. There are 5 axes each using a servo motor and there is feedback from each of the arm movements. Control is by any computer with an expansion bus – the ZX81 being particularly suitable. Servoing is achieved with hardware on the interface board to keep programming simple and the robot is operated under BASIC commands with no computer specific software required. The interface board is memory mapped using only 64 bytes at any of 1024 switch selectable locations.

MICROGRASP robot kit with power supply

£125.00

Universal computer interface board kit

£48.50

23 way edge connector

£2.50

ZX81 peripheral/RAM Pack splitter board

£3.00

HEBOT II is a turtle-type robot which takes programming out of the two dimensional world of the VDU into the real three dimensional world. Given a Dc supply of 9-15V it can perform a bewildering number of moves under computer control – forwards, backwards, left and right – with each wheel independently controlled. It has blinking eyes, bleeps with a choice of two tones and has a solenoid operated pen to chart its progress. Touch sensors coupled to its shell returns data, about its environment, to the computer for it to calculate evasive or exploratory action. HEBOT II connects directly to an I/O port or alternatively with the universal interface board to the expansion bus of a ZX81 or other computer.

HEBOT II kit

£75.00

Universal computer interfaced board

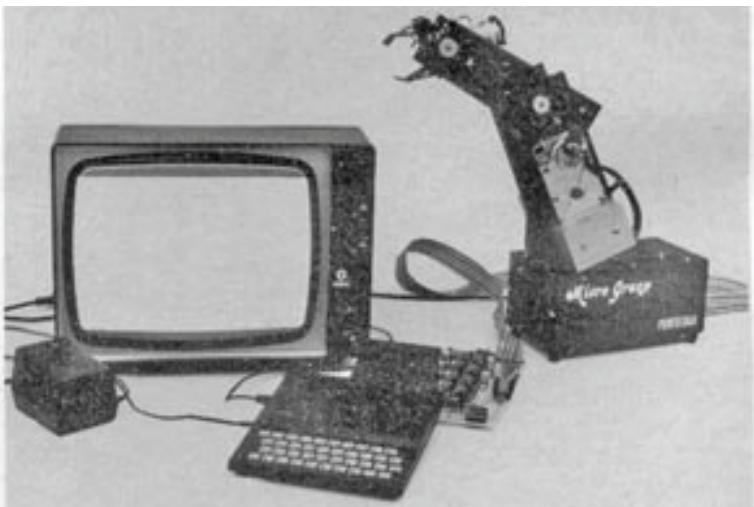

£10.00

23 way edge connector

£2.50

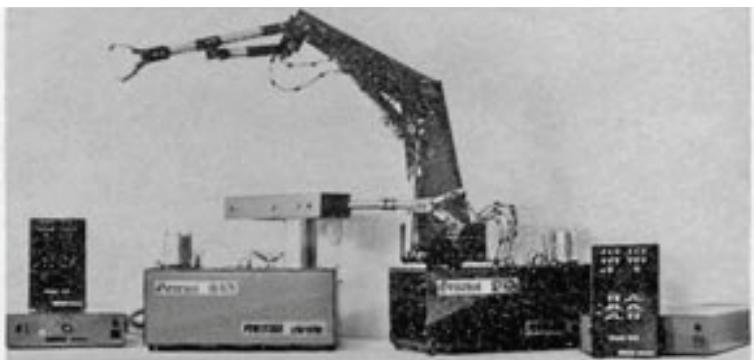

ZX81 peripheral/RAM Pack splitter board

£3.00

GENESIS S101 AND GENESIS P101 WITH PROCESSOR BOXES AND HAND-HELD CONTROLLERS

GENESIS P102 PROCESSOR BOX, HAND HELD CONTROLLER AND CORTEX COMPUTER

Top of the range is the Genesis P102 which has a dual speed control, continuous servo operation and double acting cylinders for increasing torque on the wrist and arm rotation joints. The microprocessor based control system has additional memory, position interrogation via the RS232C interface increasing the versatility of computer control and inputs are provided for machine tool interfacing.

£2.50

£3.00

With prices started below £1,000 the genesis range of general purpose robots provide a first rate introduction to robotics for both education and industry. Each has a self-contained hydraulic power source, which enables loads of several pounds to be smoothly handled. The system operates from a single phase 240 or 120V AC supply or a 12V DC supply. The machine can be supplied with up to 6 axes each of which is fully independent but capable of simultaneous operation. Position control is achieved by means of closed-loop feedback system based around a dedicated microprocessor. Movements sequences can be entered, stored and replayed by use of a hand held controller, alternatively the systems can also be interfaced to an external computer via a standard RS 232C link.

Example prices and specifications

Genesis S101

Base: 19.5" x 11" x 7.5"

Lifting capacity: 1500gm

Arm lift: 6.6"

Weight: 29 Kg

4 axis model in kit form £390

5 axis model in kit form £445

5 axis model READY BUILT £790

Genesis P101

Base: 19.5" x 11" x 7.5"

Lifting capacity: 2000gm

Arm lengths between axles: 14.0"

Weight: 34 Kg

4 axis model in kit form £495

6 axis model in kit form £595

6 axis model READY BUILT £950

COMPLETE SYSTEMS AS SHOWN IN PHOTOGRAPH ABOVE

Genesis S101

4 axis model in kit form £635.50

5 axis model in kit form £695.00

5 axis model READY BUILT

£1355.00

Genesis P101

4 axis model in kit form £742.00

6 axis model in kit form £852.00

6 axis model READY BUILT

£1625.00
